

SANTHOSHA A D

+91 8095232578 | santoshad1998@gmail.com | [linkedin.com/in/santhosh-ad](https://www.linkedin.com/in/santhosh-ad)

PROFESSIONAL SUMMARY

Lead Software Engineer with strong experience in Cloud Infrastructure, DevOps, and Microsoft Azure cloud deployment management. Skilled in building, deploying, and managing scalable applications using Azure App Services, Azure DevOps, and CI/CD pipelines with GitHub Actions. Experienced in handling production deployments, release management, infrastructure automation, environment configuration, and platform stability across enterprise applications. Familiar with Azure monitoring, cloud resource management, and deployment optimization, along with working knowledge of AWS services such as EC2, S3, IAM, and Elastic Beanstalk, and Oracle Cloud Infrastructure (OCI) services including Object Storage, Monitoring, and Autonomous Database. Strong focus on cloud operations, deployment reliability, and enterprise infrastructure support.

TECHNICAL SKILLS

- **Cloud Platforms:** Microsoft Azure (App Services, Monitoring, Sql server, Networking, VNet, NSG,IAM), AWS (EC2, S3, IAM,Elastic Beanstalk,codepipeline,RDS), Oracle Cloud Infrastructure (OCI Object Storage, Monitoring).
- **DevOps & Automation:** CI/CD Pipelines, GitHub Actions, Terraform (IaC), Docker, OCI Resource Manager, Git, Gitbash, Linux Commands, Cloud Shell (Familiar).
- **Programming & Frameworks:** Python, JavaScript, HTML, CSS, Bootstrap, SQL, Django, FastAPI, Flask, React Native, REST API Development.
- **Database Technologies:** Microsoft SQL Server (Optimization & Tuning), Oracle Database, Oracle 23ai Vector Database.
- **AI & Integration:** LangChain, LangGraph, RAG Pipelines, OpenAI, Gemini, Vector Embeddings (Pinecone).
- **Domain & Email Services:** GoDaddy, Hostinger, Cloudflare, Resend, SMTP Configuration, Gmail Integration.

PROFESSIONAL EXPERIENCE

Navabharath Technologies | Lead Software Engineer

Mysore, Karnataka, India | Nov 2025 – Present

- Orchestrate cloud deployments and production applications using **Microsoft Azure** and **Azure App Services**, ensuring high availability and scalability.
- Architect and maintain robust CI/CD pipelines via **Azure DevOps** and **GitHub Actions** to streamline release management.
- Drive database performance through strategic **SQL Server** design, optimization, and rigorous performance tuning.
- Lead the development of cross-platform mobile applications using **React Native** for Android and iOS.
- Direct application architecture, ensuring code quality, security protocols, and deployment reliability across enterprise systems.

Key Project:

- **Azure DevOps Deployment System:** Designed and implemented automated CI/CD pipelines (Azure DevOps/GitHub Actions) for production applications, managing full lifecycle from code commit to Azure App Services hosting.
- **React Native Mobile App & Azure Backend Management:** Led full-stack deployment of React Native mobile application for Android/iOS on Azure App Services and managed continuous server maintenance for all organization application backends deployed across Azure App Services.

Cloud4biz | Associate Software Engineer – Cloud & AI

Remote | Sep 2024 – Oct 2025

- Engineered cloud-native **Retrieval-Augmented Generation (RAG)** systems leveraging **OCI** and **Oracle 23ai** for advanced data retrieval.
- Integrated multi-source data repositories, including OCI Object Storage and Google Drive, with Vector Databases for enterprise knowledge management.
- Automated infrastructure provisioning using **Terraform** and established seamless deployment workflows with **GitHub Actions**.

- Implemented cloud observability using **OCI Monitoring APIs** for proactive anomaly detection and performance analysis.

Key Projects:

- **OCI Cloud Monitoring Agent:** Developed a custom monitoring solution using OCI APIs to track real-time CPU, memory, and network metrics, integrating automated alerting.
- **Multi-Source RAG Cloud System:** Enterprise-scale semantic search platform using Oracle 23ai Vector Database and OCI Object Storage for highly accurate document retrieval.
- **OCI Markdown PDF Generator:** Developed an AI-driven solution that analyzes and formats plain or structured content into professional Markdown-styled PDF reports, uploads them to OCI Object Storage, and generates pre-authenticated access URLs—streamlining report creation, reducing manual effort, and improving accessibility.
- **Google Drive Knowledge Base Integration:** Built an AI-driven system that extracts content from Google Drive documents, processes it into vector embeddings using OCI 23 AI, and stores it in vector data storage—enabling efficient search and retrieval of relevant information to support decision-making and knowledge sharing.

Cloud4biz | Trainee Engineer – Intern

Jun 2024 – Aug 2024

- Supported the deployment and automation of services within **Oracle Cloud Infrastructure**.
- Utilized **Terraform** for infrastructure as code (IaC) to automate resource setup.
- Executed CI/CD workflows and managed version control using **Git** and **Linux** environments.

EDUCATION

Bachelor of Engineering (B.E.) in Information Science

Bapuji Institute of Engineering and Technology, Davangere | 2021 – 2024

CERTIFICATIONS

- **Oracle Cloud Infrastructure (OCI) 2025** Certified Architect Associate
- **Oracle Cloud Infrastructure 2025** Certified AI Foundations Associate
- **OCI Generative AI** Certified (2025)
- **OCI Foundational Associate** (2024)
- **Prompt Design in Vertex AI** Skill Badge (Google Cloud)
- **JavaScript Programming** (Udemy, 2021)
